

Petition

The undersigned, being owners of real estate fronting or abutting on either side of that portion of an easement 10 feet wide extending approximately 950 feet east from the current water service line, parallel to Fifth Street, an undedicated private road, with an additional ten feet wide easement running 125 feet north along Fir Drive, an undedicated private road, to the extent of at least one-half of the entire frontage on both sides of said portion of the easement, and including resident owners owning not less than one-half of the aggregate frontage owned by resident owners residing in or along said portion of said easement, do hereby petition as follows:

1. Petitioners propose, pursuant to Town Law § 199, that the Town Board of the Town of Somerset, New York (the "Town"), authorize and approve construction of lateral water mains in or along that portion of said easement in the Town of Somerset Water District No. 1 described as follows: extending approximately 950 feet east from the current water service line, parallel to Fifth Street, an undedicated private road, with an additional ten feet wide easement running 125 feet north along Fir Drive, an undedicated private road.
2. The Town of Somerset Water District No. 1 is a district in which the expense of establishing the district and of providing improvements therefor must be apportioned and assessed, pursuant to Town Law § 202.
3. The lateral water main installation would improve and extend fire protection services to our property. Currently, structures on our premises are at risk due to the lack of fire hydrants in close proximity to portions of the property. Extending the lateral water main will provide the ability to install new fire hydrants so that all portions of our premises can be serviced within 1,000 feet of a fire hydrant. Without the extension of the lateral water main, certain structures upon our premises are vulnerable to fire loss.
4. The maximum amount to be expended for the aforesaid improvement by the Town is \$0.00, as we the undersigned propose to fully fund the installation of the aforesaid lateral water lines and as a "gift" to the Town of Somerset Water District No. 1.
5. The entire frontage on both sides of that portion of said easement above-described is 2,150 feet. The aggregate frontage owned by all resident owners residing in or along that portion of said easement above described is zero feet.
6. All of the petitioners are owners of real estate fronting or abutting upon either side of that portion of said easement above-described, including owners residing in or along said portion of said easement, whose property fronts or abuts said portion of said easement to the extent respectively set out next to the names of the petitioners as follows:
